Measure | Poverty Rates (Average poverty rate is 41%)
---|---
Meeting Standards | All districts with 80%+ of poverty got Fs. 80% of the wealthiest two quintiles got As. 95% of the lowest poverty quintile got As. Of the 96 districts that have more than 60% poverty, only 3 got As. No district with less than 40% poverty got Fs. More As were given than any other grade.

Performance Index | Nearly 90% of the As are in the districts with the lowest Poverty rates. No Fs. Only one D in any district below 60% poverty. No As until middle 1/5th of districts (40-60%). 92% of all grades are B or C. More than 1/3 of all Ds are in districts with highest poverty rates, and 18 of the 19 are in poorest two quintiles.

District Typeology | Only 1 Major Urban did not get an F, and it got a D. 39% of As were in suburban districts. 83% of Fs were in urbans. Every wealthy suburban gets an A or B.

Standards by District Type | Standards by District Type

PI by District Type | PI by District Type

Nearly 90% of As are in the wealthiest Suburban Districts. 56% of Ds are in Major Urbans. 2/3 of Major Urbans get Ds. Other third get Cs. Only 3 Cs in Suburban districts, wealthy and wealthiest. Nearly 60% of poorest rural districts get Bs, rest Cs. No Ds.
% of Districts with 80%+ poverty got Fs. 10% of lowest poverty rates got Fs. The lower your poverty rate, the smaller percentage of Fs you get. And the lower your poverty rate, the higher percentage of As you get.

3 Major Urbans get As. 8 of 15 get Fs, though. 89% of wealthiest suburbans get As. 2 get Fs.

As you get less poverty, you get lower percentages of Fs. Only reason you don’t get higher percentage of As is only 1 of 14 of the highest poverty districts got an A, so that’s a higher percentage than the 3 of 70 that got As in the next poverty quintile. Two of the lowest poverty districts got Fs. First measure that any of the lowest poverty districts got an F in.

52% of As are in Suburban Districts. 10% of Fs are. 33% of Fs are in high or very high poverty districts. More than 1/2 of major urban districts get C or better.
Lower poverty rates bring lower rates of Fs. However, not true on As. Districts at 60%-80% of poverty have higher rates of As than districts between 20%-60% poverty. However, they have double the rate of Fs.

Over ½ of Major Urbans got C or better. 38% of all As in suburban districts; 28% in high or very high poverty districts. Nearly 80% of districts got C or better – 42% got Cs. More than ½ of all Fs came from high and very high poverty districts.

Only category where the highest poverty rate districts have higher percentages of As than the lowest poverty rate districts. The highest poverty rate districts also have higher percentages of Fs than the lowest poverty rate districts. The highest percentage rate of As is among the 60%-80% poverty rate districts. Only 4 of 87 As came from the lowest poverty rate districts.

Majority of As are not in suburban districts. Nearly the same percentage of As come from the high and very high poverty districts as come from the suburban districts. 59% of Fs come from high and very high poverty districts.
More than ½ of As are in the lowest poverty rate districts. All of the poorest districts got Fs. Only 3 of 188 Fs come from lowest poverty rate districts. Only 1 of 27 As come from districts with greater than 60% poverty. As poverty goes down, rate of As goes up and Fs goes down. 76% of lowest poverty district get As or Bs. 77% of districts with greater than 60% of poverty get Fs.

76% of lowest poverty districts get As or Bs.

77% of districts with greater than 60% of poverty get Fs.

All major urbans got Fs. 15% of As come from high or very high poverty districts. 30% of As come from suburbans. 31% of all districts got Fs. 66% of all Fs from high or very high poverty districts. 10% of all Fs from suburban.

All but 1 of the 26 Fs went to districts with greater than 60% poverty rates. 68% of As went to districts with less than 40% poverty rates. More than 90% of lowest poverty rate districts got As. 92% of districts with less than 40% poverty rates got As or Bs. 20 of 24 Fs

All but 1 Fs are in Urbans or Major Urbans. 33% of As are in suburbs. 17% of As are in high or very high poverty districts. Nearly 12 of all districts get As. 4% get Fs. 75% of districts get A or B. All but 2 major urbans get Fs, rest get Ds. No suburban gets an F.
Five-Year Grad Rate

20 of 24 Fs are in districts with greater than 60% poverty. 75% of As are in districts with less than average poverty rates. Only 5 of 59 Ds and Fs are in districts with below average poverty rates. 93% of below average poverty get As and Bs.

87% of all Fs in urban districts. 2/3 of major urbans get Fs. No suburbans get Fs. No wealthiest suburbans get Ds either. 38% of As in suburban districts. 14% in high or very high poverty districts.

Only 1 district with below average poverty rates got a C (CI), and none got Ds or Fs. 99.7% of districts below poverty got As or Bs, with 85% of those being A or A+.

All Fs were in districts with highest poverty rates. And only 19 of 386 As given went to districts with poverty rates greater than 60%.

98% of the richest districts get A or A+. All but 1 D or F district is high or very high poverty.
